**MOTION TO RECEIVE EXHIBITS**

Gerard A. Turro, by his attorneys, pursuant to directions of the Presiding Judge, hereby requests that the three accompanying exhibits be received into evidence in the above-captioned proceeding.

During the hearing in this case, Mr. Turro presented two live demonstrations using several items of equipment and offered into evidence a different piece of equipment known as a Phase Cancellor. Consistent with the Judge's instructions, photographs were taken in the hearing room of the equipment arrangements for both demonstrations and of the Phase Cancellor to preserve their appearances for the record as accurately as reasonably possible. Therefore, accompanying this Motion are the following:

Turro Exhibit No. 38, one color photograph of the Dumont-Monticello demonstration,

Turro Exhibit No. 39, one color photograph of the Dumont-Fort Lee demonstration, and

Turro Exhibit No. 40, four color photographs of the Phase Cancellor.

We represent that the photographs used in these exhibits are the most accurate of those taken.

Concurrently, two copies of each of these exhibits have been forwarded to the reporter and copies of them submitted to the Commission's Secretary.<sup>1</sup> We will withdraw those exhibits from the reporter and the Secretary in the event that this Motion is denied.

Therefore, we respectfully request that the Judge open the record in this proceeding for the limited purpose of receiving Turro Exhibit Nos. 38, 39 and 40 into evidence, and that such exhibits be so received.

Respectfully submitted,

GERARD A. TURRO

FM EXAMINERS

Dear Mr. Caton:

Transmitted herewith, in triplicate, on behalf of Monticello Mountaintop Broadcasting, Inc., permittee of FM broadcast station WJUX (formerly WXTM), Monticello, New York, is an amendment to that station's pending application for a license to cover its construction permit. The File Number of the pending license application is BLH-941031KD. This amendment covers the replacement of the station's originally authorized main antenna with a new main antenna, which replacement was made necessary by a lightning strike that destroyed the original antenna.

In the event there are any questions concerning this matter, please communicate with the undersigned.

Very truly yours,

*Arthur B. Goodkind*

***CARL T. JONES***  
***CORPORATION***

STATEMENT OF WILLIAM J. GETZ  
IN SUPPORT OF AN AMENDMENT TO  
AN APPLICATION FOR LICENSE  
WJUX(FM) [formerly WXTM(FM)] - MONTICELLO, NEW YORK  
CHANNEL 259A - 6.0 kW - 91 m HAAT

Prepared For: Monticello Mountaintop Broadcasting, Inc.

I am a Radio Engineer, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission.

This office has been authorized by Monticello Mountaintop Broadcasting, Inc. ("Mountaintop"), to prepare this statement and a revised Section II of FCC Form 302-FM in support of an amendment to the pending Application for License (FCC File No. BLH-941031KD) to cover the WJUX(FM) [formerly WXTM(FM)], Monticello, New York, outstanding Construction Permit (File No. BPH-910214MD, as modified by BMPH-920214IC and extended).

By letter dated April 13, 1995, Mountaintop informed the Federal Communications Commission that the WJUX(FM) main antenna suffered a lightning strike on April 4, 1995 and the station began operation with an emergency transmitting antenna on April 12, 1995 (see attached). The main antenna, which was specified in the original Application for License, was damaged beyond repair and a new 3-bay nondirectional antenna was installed in its place on April 22, 1995. In addition, the entire length of the transmission line was replaced because of extensive damage as a result of the lightning strike. Radio

STATEMENT OF WILLIAM J. GETZ  
WJUX(FM) - MONTICELLO, NEW YORK  
PAGE 2

Station WJUX(FM) began operation with the new antenna/transmission line on April 22, 1995. This amendment sets forth the technical specifications of the new transmission system.

A new ERI LPX-3E, 3-bay, nondirectional antenna replaces the original 3-bay Cablewave CFMLP-3 nondirectional antenna. Because the ERI antenna is rated by the manufacturer with a slightly greater power gain than the Cablewave antenna, this amendment also reflects a slight decrease in Transmitter Power Output (TPO) to maintain the authorized Effective Radiated Power. The new antenna was installed in the same vertical aperture as the old antenna at the identical radiation centerline height above ground level. There are no further changes in system gains or losses. A complete description of the technical parameters of the WJUX(FM) transmission system is provided in Section II of the attached, revised, FCC Form 302-FM.

It is submitted that the WJUX(FM) main facility is in compliance with FCC technical standards and is operating in accordance with the terms and conditions as set forth in the outstanding Construction Permit.

DATED: April 26, 1995

  
William J. Getz

April 13, 1995

FILED  
OFFICE OF THE  
SECRETARY

APR 14 '95

RECEIVED

Mr. William F. Caton, Acting Secretary  
Federal Communications Commission  
1919 M Street, N.W.  
Room 222  
Washington, D.C. 20554

Dear Mr. Caton:

This letter is submitted on behalf of Monticello Mountaintop Broadcasting, Inc., licensee of WXTM(FM), Monticello, New York. The main antenna suffered a lightning strike on April 4, 1995. On April 11, 1995, the damage to the main antenna became apparent and an emergency transmitting antenna was installed near the top of the existing tower structure. In order to maintain service to the public WXTM(FM) was forced to commence operation with the emergency transmitting antenna on April 12, 1995. The purpose of this letter is to request authority to continue operation with the emergency antenna until the necessary repairs are completed on the main transmit antenna.

The technical specifications of the emergency operation are as follows:

Transmitter Power Output	2.5 kW
Transmission Line	300 feet, 7/8-inch foam dielectric
Transmission Line Efficiency	77.6%
Emergency Antenna	1-bay, horizontal polarization only, gain=0.5
Effective Radiated Power	1.0 kW
Antenna Height	557 meters Above Mean Sea Level

The addition of the emergency antenna will not contribute to the overall height of the existing support structure and all painting and lighting requirements on the tower shall be maintained. The predicted 1.0 mV/m contour of the emergency operation will be wholly within the licensed WXTM(FM) 1.0 mV/m contour.

In the event there are any questions concerning this matter, please contact the undersigned.

Sincerely,

  
William J. Getz
